

# YOUR LAST ROOF NEXT 1" NAIL STRIP PANELS

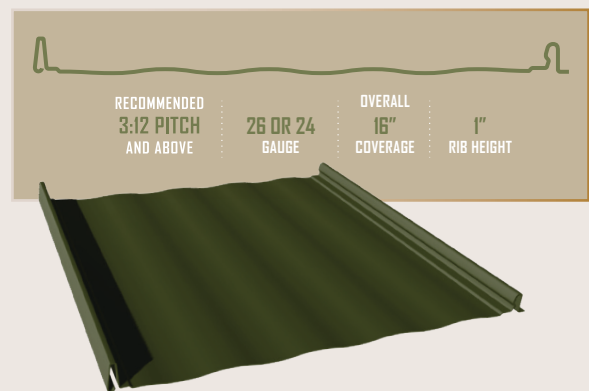

Live Oak Metal Works & Supply's 1" Nail Strip Panels are our most cost-effective concealed-fastener profile and they're well-suited for both residential and light commercial applications. These panels feature a slotted "nail strip" flange on the under-lap edge of the panel which conceals the low-profile fasteners, ensuring low maintenance and long life. The "snap lock" design also avoids the need for a mechanical seamer and allows for a faster, easier installation. These panels are manufactured with American-made Galvalume® steel sheet and are available with an acrylic-coated mill finish or painted with a variety of high-performance Sherwin-Williams® WeatherXL™ silicone modified polyester coatings or Fluropon® PVDF coatings.

## TECHNICAL SPECIFICATIONS

- The 1" Nail Strip Panels are particularly well-suited for roofing applications but can also add architectural interest when used as a wall panel.
- Features 26-gauge steel, but may also be manufactured using heavier 24-gauge steel.
- Features strong and durable structural steel with a minimum yield strength of 50,000 lbs/in<sup>2</sup>.
- 16" coverage.
- 1" rib height.
- Includes striations to minimize visibility of any potential oil-canning.
- 3:12 minimum slope.
- 1" x ¼" slots equally spaced every 5<sup>3</sup>/<sub>16</sub>" for easy fastener installation.
- Installs over solid decking with our Roofnado™ AnchorDeck™ or AnchorDeck™ PSU underlayment.
- Painted AZ50 Galvalume® steel with industry-leading Sherwin-Williams® WeatherXL™ or Fluropon® paint systems, or in a mill finish AZ55 Galvalume® steel sheet with a clear acrylic coating.

## 1" NAIL STRIP PANEL PROFILE

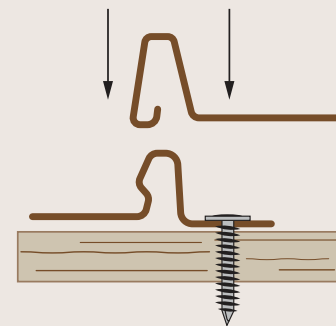

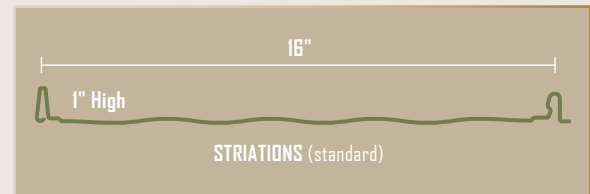

# YOUR LAST ROOF NEXT 1" NAIL STRIP PANELS

Live Oak Metal Works & Supply 1" Nail Strip Panels start with Prime 26-gauge Galvalume® steel sheet that's been made in the USA. These panels are available in a variety of durable Sherwin-Williams® WeatherXL™ silicone modified polyester or Fluoropon® PVDF coatings, or in a mill finish with a protective clear acrylic coating.

## FEATURES

- Our 1-inch Nail Strip Panels are our most cost-effective concealed-fastener profile and they're generally compliant with the industry's highest standards for impact resistance, fire resistance, and wind uplift:
  - UL2218 Class 4 Impact Resistance.
  - UL790 Class A Fire Resistance.
  - UL580 Class 90 Wind Uplift.
- Self-locking "snap lock" design and integral slotted flange eliminate the need for clips and mechanical seaming and simplifying installation.
- Available in 26-gauge, or in an optional 24-gauge thickness for enhanced strength and durability.
- 16" coverage.
- Custom lengths.
- Striated profile reduces the visibility of any oil-canning.
- Pre-punched slots for easy installation of concealed pancake fasteners.
- 50-year substrate warranty on painted AZ50 Galvalume® steel sheet or 45-year warranty on acrylic-coated Galvalume® steel sheet.
- Our metal roofing and siding panels are available with sophisticated Sherwin-Williams® "cool" coatings that contain solar-reflective pigments, keeping roofs cooler and conducting less heat into the buildings, reducing energy costs.
- Industry-leading paint warranties available.
- Standard and custom trim and all the accessories and tools needed for a quality installation.

*Our metal roofing and siding is proudly made in the South Carolina Pee Dee using only the finest American-made Galvalume® steel sheet.*
